What is special about Tiffany lamps?

Tiffany lamps are characterized by their intricate organic patterns, harmonious color palettes, and jewel-like stained glass. Each lamp is handmade by skilled craftsmen, not mass- or machine-produced.

These iconic stained glass lanterns have been popular for over a century because they are incredibly distinctive, but they can still be beautifully integrated into almost any room.

They are named after their inventor, American designer Louis Comfort Tiffany.

How is a Tiffany lamp made?

Every lamp is prepared by using the copper-foil method.

First, a pattern for the lamp is drawn out on a heavy piece of cardboard. Next, a number and glass color are written on the pattern piece. After the pattern is drawn and labeled, the glass is laid over it and traced. Once the pattern is traced onto the glass, the pieces can be cut and ground to their correct shape. Next, the pieces need to be cleaned so the copper foil can be applied to the edges. The copper-foil solution allows the pieces to adhere together. After the lamp has been placed accordingly and it is fully bonded, the edges are soldered together for a firm hold. Finally, after the lamp has been soldered, it is cleaned.

All Tiffany lamps are made by hand in the same way and cannot be made by machine or automation in any way.

Geometric patterns in Tiffany style

Geometrical designs became very fashionable during the Art Deco period.

Typical is the use of symmetrical, cohesive patterns which are used repeatedly throughout the designs. Some designs have different pieces of striking colored glass, whereas other designs are more detailed and vibrant.

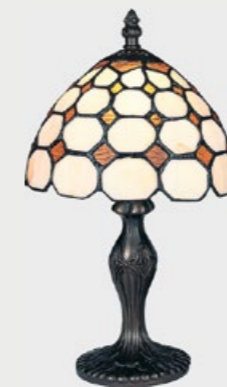

The use of contrasting and striking colored glass is typical for this style.

Tiffany nature style

The natural style is very traditional. It is the first style which has been created and is all about floral designs, floral motives and creations inspired by nature. Think of all the treasures that nature brings. Take a look at the pure artwork and the colorful touches of nature.

A typical Tiffany lampshade might feature a sparkling swarm of dragonflies, an energetic overgrowth of springtime blossoms, or a tangle of grapevines ripe for the picking. These patterns are brought to life by a harmonious arrangement of bold colors that expertly play with contrasting and complementary hues.

Tiffany lamps are typical of the boho style

What is boho style or decor? Boho is unconventional and free-spirited, and the style and decor reflect that, bringing a mixture of patterns, textures, woods, colors, and metals to the home.

What colors are used in boho decor? Think neutral colors with splashes of warm, bright colors thrown in.

Innovative series of atmospheric contemporary lamps

Tiffany lamps do not only bring light, but also add color and warmth to any interior.

A simple tip to enhance the colors is to always use clear bulb instead of pearl or opal bulbs. A clear bulb creates a sparkling effect through the colored translucent glass of the Tiffany lamp.

Texture with unique gauzy and milky effect

The glass pieces of a Tiffany lamp are translucent enough for light to pass through, but their texture often has a gauzy or milky effect. This quality showcases the hand of the artisan by emphasizing the purposefully subtle variations in texture, thickness, and color saturation.
